Subject: WOUS Connectivity FRN

Tom:

(b)(5)

Here is my understanding of today.

SAB staff are satisfied that they have full approval to release the draft report at noon today. I believe Chris is satisfied with feedback from Arvin and doesn't need anything more from the Administrator's office.

This morning, SAB staff will transmit to the EPA FRN office the FRN. My understanding is that we are asking for publication as soon as possible. As you hear when the FRN will be published, please let me know so that we can update the ORD-NCEA web page.

Shortly before noon today, the SAB will transmit a memo to the EPA docket office officially requesting that the docket for the WOUS connectivity be opened.

At noon today, the SAB will post on the Connectivity web page the draft report and the pre-publication FRN. At the same time, ORD-NCEA will make the report available through the NCEA web pages.

Questions concerning the SAB peer review of the draft report are to be referred to Tom Armitage.

Questions concerning the report itself, the conclusions of the report, and potential uses of the report will be referred to Laurie Alexander.

End of the day: Everyone give great cheer for the successful release of the draft report.

Thanks Tom and Iris for all your support and hard work. You have pulled together a very talented panel and I look forward to their comments.
